## Variables

The **Variables** extension allows you to define a variable on a page, use it later in that same page or included templates, change its value, possibly to a value given by an expression in terms of the old value, etc.

For more information please visit [MediaWiki](#).

Variables	
Parser functions allowing to work with dynamic variables in an article scoped context

## ISC

The ISC license, or ISCL for short, is a license for ISC open source software. It is a modified version of the "2-clause" BSD license, a BSD license containing only the first two paragraphs.
