<b>Activated:</b>	- "-" is not recognized as a Boolean (true/false) value.
<b>Category:</b>	-

In order to protect own pages on the Internet from web crawlers, the "robots.txt" was introduced.

This file is located in the root directory of the server and is a web crawler control file that can ban.

It is often used to reduce the data traffic caused by the large number of web crawlers or to block certain areas for the web crawlers.

For further information about this file, please refer to the [Wikipedia](#).
