1. Setup:Installation Guide/System Preparation/Windows/Introduction	2
2. Setup:Installation Guide/System Preparation/Windows/Setting the system rights of the	
temporary Windows folder	2

This documentation is as detailed as possible and illustrated with screenshots. It covers the recommended basic system configuration. Nevertheless, we assume that you already have previous knowledge of the installation and operation of Windows Server systems.

The prerequisite is an already installed Windows server starting at version 2016 without any additional software already installed.

In this documentation, Windows Server 2022 was used. With different versions, it is possible that you will notice slight differences in the installation interface.

The documentation also includes clearly marked infoboxes that inform you about whether particular installation steps are necessary and that provide any further information.

First start with setting the system rights of the temporary Windows folder.

Setup:Installation Guide/System Preparation/Windows /Setting the system rights of the temporary Windows folder

1	Procedure	
2	Next step	

Various applications require rights to write to the C:\Windows\Temp folder. These are not set as needed by default. In order to be able to carry out all further steps smoothly and also to be able to operate BlueSpice, you must first set these rights.

Procedure

Open Windows Explorer:

Right-click on the folder "Temp" (1) and open the "Properties" (2):

Open Open in new window	Local Disk (C:) > Windows			ڻ ~	,○ Search Windows	
Pin to Quick access	Name	Date modified	Туре	Size		^

Close all further dialog windows with "OK" or "Yes".

The rights for the temporary Windows folder are now set up correctly.

Next step

If you have successfully completed all of the above steps, proceed to the next step: .NET Framework 3.5.
