## Templates download

The content format pdf is not supported by the content model wikitext.

Return to [Main Page](#).

## View source for Templates download/Action points

You do not have permission to edit this page, for the following reason:

The action you have requested is limited to users in the group: **Users**.

You can view and copy the source of this page.

```
<div class="downloadarea"> <span class="getButton">[[Media:HW-Action points.zip|Download]]</span><br /><br /> "Action points on a page:"<br /> [[File:HW-AP.png|450x450px|alt=action points on a single wiki page]]<br /><br /> "All open action points in the wiki:"<br /> [[File:HW-AP-list.png|450x450px|alt=list of all open action points]]</div>
```

This template creates action points that can be included on meeting minutes or other wiki pages. In addition, an overview page of all open tasks is included. It requires [[Reference:Semantic MediaWiki|SemanticMediaWiki]] ( included in BlueSpice pro). ==Importing the template== The import file is included in the archive file "HW-Action points.zip". Unpack the zip file first. On the page "Special:Import" follow these steps: #"Select file" and choose "HW-Action points.xml". #"Enter" an Interwiki prefix. Since this field is required, simply add "hw" (for hallowelt). #"Keep" the selection "Import to default locations". #"Click" "Upload file..." . The template is now available in your wiki. ==Pages included in the import== The xml import creates the following files in your wiki: \*Template:Action points \*Template:Action points/styles.css \*Action points list (Page in the main namespace) \*Property:Ap-duedate \*Property:Ap-name \*Property:Ap-status \*Property:Ap-description  
==Using the template== #Add the template from the [[Manual:Extension /VisualEditor|VisualEditor]] insert-dialog. #Fill in the form fields as needed. {{Messagebox|boxtype=note|Note text=lf, after importin the template to your wiki, the input fields are not displayed when you first integrate it into a wiki page, you need to open the template in the template namespace, make a change (e.g. insert spaces) and save the template. The input fields should now be displayed correctly.}} [[File:HW-AP-templatedata.png|center|thumb|450x450px|Input fields for action points|link=Special:FilePath/HW-AP-templatedata.png]] {| class="contenttable-blue" style="width:950px;" |+ style="box-sizing: inherit; padding-top: 8px; padding-bottom: 8px; color: rgb(119, 119, 119); text-align: left;" | ! style="background-color:rgb(239, 243, 249);text-align:inherit; box-sizing:inherit;padding:4px;border:1px solid rgb(177, 185, 207);color:rgb(62, 83, 137);" |Input field ! style="background-color:rgb(239, 243, 249);text-align:inherit;box-sizing:inherit;padding:4px;border:1px solid rgb(177, 185, 207);color:rgb(62, 83, 137);" |Description |- style="box-sizing: inherit; border: 1px solid rgb(177, 185, 207); border-spacing: 0px; border-collapse: collapse; padding: 10px;" | style="box-sizing:inherit;padding:10px;border: 1px solid rgb(177, 185, 207);border-spacing:0px;border-collapse:collapse;" |Who? | style="box-sizing:inherit; padding:10px;border:1px solid rgb(177, 185, 207);border-spacing:0px; border-collapse: collapse;" |Person that needs to complete the task. Pulls up the wiki users, but entering any name is possible. |- style="box-sizing: inherit; border: 1px solid rgb(177, 185, 207); border-spacing: 0px; border-collapse: collapse; padding: 10px;" | style="box-sizing:inherit;padding:10px;border:1px solid rgb(177, 185, 207);border-spacing:0px;border-collapse: collapse;" |What? | style="box-sizing:inherit;padding:10px;border:1px solid rgb(177, 185, 207);border-spacing: 0px;border-collapse:collapse;" |Task description |- style="box-sizing: inherit; border: 1px solid rgb(177, 185, 207); border-spacing: 0px; border-collapse: collapse; padding: 10px;" | style="box-sizing:inherit;padding:10px; border:1px solid rgb(177, 185, 207);border-spacing:0px;border-collapse:collapse;" |Status | style="box-sizing: inherit;padding:10px;border:1px solid rgb(177, 185, 207);border-spacing:0px;border-collapse:collapse;" |open or closed. |- style="box-sizing: inherit; border: 1px solid rgb(177, 185, 207); border-spacing: 0px; border-collapse: collapse; padding: 10px;" | style="box-sizing:inherit;padding:10px;border:1px solid rgb(177, 185, 207); border-spacing:0px;border-collapse:collapse;" |Due date | style="box-sizing:inherit;padding:10px;border:1px solid rgb(177, 185, 207);border-spacing:0px;border-collapse:collapse;" |Date, should be entered as YYYY/MM/DD |- style="box-sizing: inherit; border: 1px solid rgb(177, 185, 207); border-spacing: 0px; border-collapse: collapse; padding: 10px;" | style="box-sizing:inherit;padding:10px;border:1px solid rgb(177, 185, 207);border-spacing:0px;border-collapse:collapse;" |Comment | style="box-sizing:inherit;padding:10px;border:1px solid rgb(177, 185, 207);border-spacing:0px;border-collapse:collapse;" |Use for any additional information. The idea is to provide a closing comment. }} ==Task overview list== The included page "Action points list" shows all open tasks. It uses [[SMW queries|SMW]] to display a table of all open action points in the wiki, but can be easily adjusted to filter by namespace or subpages (to filter out meeting minutes, for example). <br /> [[File:HW-AP-list.png|alt=List of all open tasks|center|thumb|650x650px|List of all open action points]] <br /> \_\_NOTOC\_\_

## View source for Templates download/Language switcher

You do not have permission to edit this page, for the following reason:

The action you have requested is limited to users in the group: **Users**.

You can view and copy the source of this page.

```
<div class="downloadarea"> <span class="getButton">[[Media:HW-LanguageSwitcher.zip|Download]]</span>
[[File:HW-languageswitcher.png|350x350px|alt=language switcher screenshot]] </div>This download file
includes two versions of a language switcher. Supported languages can be defined in the templates.
==Importing the template== The import file is included in the archive file "HW-LanguageSwitcher.zip". Unpack
the zip file first. On the page "Special:Import" follow these steps: # "Select file" and choose "HW-
LanguageSwitcher.xml". # "Enter" an Interwiki prefix. Since this field is required, simply add "hw" (for
hallowelt). # "Keep" the selection "Import to default locations". # "Click" "Upload file..." . The templates are now
available in your wiki. ==Pages included in the import== The xml import creates the following files in your wiki: *
Template:Languages * Template:Languages/styles.css * Template:InterLanguages * Property:Languages
/tracklang * MediaWiki:Lang * MediaWiki:Lang/de * MediaWiki:Lang/en * MediaWiki:Lang/fr * MediaWiki:Lang
/nl == How it works == == Template:Languages == This template is used to switch between a page and its
translated versions when the translations are maintained as subpages. The template defines some variables to
determine which languages you want to support. It automatically determines the content language of your wiki
installation. "This variable "cl" is required and must not be deleted." * You need to define at least one language
for the switcher to make sense. Each language variable is named as lowercase l (for language) "l1", "l2",.... The
value needs to be provided as the [https://de.wikipedia.org/wiki/Liste_der_ISO-639-1-Codes ISO 639-1
language code] for the language. For Spanish, you would define:<syntaxhighlight lang="text"> {{#vardefine:
l4|es}} </syntaxhighlight> * After defining the variables, you need to add them to the actual switcher:
<syntaxhighlight lang="text"> {{#switch: {{SUBPAGENAME}} |{{#var:l1}}={{#var:switcher}} |{{#var:l2}}={{#var:
switcher}} |{{#var:l3}}={{#var:switcher}} |{{#var:l4}}={{#var:switcher}} |{{#var:cls}}={{#var:switcher}}}} </syntaxhighlight> * A
tracking property ensures that the different languages are available for further processing through Semantic
MediaWiki. This allows to create page lists of the different languages.<syntaxhighlight lang="text"> <!-- set
tracking property --> [[Languages/tracklang::{{#switch: {{SUBPAGENAME}}|{{#var:l1}}={{#var:l1}}|{{#var:l2}}=
{{#var:l2}}|{{#var:l3}}={{#var:l3}}|{{#var:l4}}={{#var:l4}}|{{#var:cl}}]] </syntaxhighlight> * Alternatively, especially
in Bluespice free (where no SMW functions and therefore no attributes are available by default), tracking
categories can be used. These are commented out in the template by default. The comment must therefore be
removed and all languages tracked as a category:<syntaxhighlight lang="text"> {{#switch: {{SUBPAGENAME}}|
{{#var:l1}}=[[Category:{{#var:l1}}]]|{{#var:l2}}=[[Category:{{#var:l2}}]]|{{#var:l3}}=[[Category:{{#var:l3}}]]|{{#var:l4}}
=[[Category:{{#var:l4}}]]|[[Category:{{#var:cl}}]]}} </syntaxhighlight> * In addition, you should add the language
to the template description for the extension [[Reference:TemplateData|TemplateData]]:<syntaxhighlight lang="
text"> "description": { "en": "Language switcher", "de": "Sprachwechsler", "fr": "Sélecteur de langue", "nl": "Taal
verandering", "es": "Cambiador de idioma" } </syntaxhighlight> == Template:InterLanguages == This
template is used to switch between a page and its translated versions when the translations are not maintained
as subpages, but are technically not associated at all. The template defines some variables to determine which
languages you want to support. "The variable "self" defines the current page. It is required and must not be
deleted." The language variables are defined just like in the template Languages. If you define additional
language variables, the newly defined languages has to be added to the language menu. The links are created
in the following container:<syntaxhighlight lang="text"> <div id="langbar-hz"> ... </div> <
/syntaxhighlight>Simply add each language with the l-number matching your language variable by copying this
line and replacing the number:<syntaxhighlight lang="text"> {{#if: {{{pgname|l4}}|{{#switch:{{{pgname|l4}}|
{{#var:self}}=[[{{{FULLPAGENAME}}|!]]|{{#var:l4}}]]|[[{{{pgname|l4}}|!]]|{{#var:l4}}]]}}}} </syntaxhighlight>In
addition, you need to add the language to the template description and the available fields in the TemplateData
editor. In source editing mode: # "Click" "Manage TemplateData"[[File:interlanguages-manageTD.
png|alt=Manage TemplateData|center|thumb|650x650px|Manage TemplateData]]<br /> # "Click" "Add
parameter"[[File:interlanguages-manageTD-addparam.png|alt=Add new languages (as parameters)
|center|thumb|514x514px|Add new languages (as parameters)]] # "Select" any new language you have added
and click "Apply".[[File:interlanguages-manageTD-editparam.png|alt=Selecting a newly added
paramter|center|thumb|515x515px|Selecting a newly added paramter]] # "Add" the language abbreviation for
the new language as a label and activate the "Suggested" checkbox and click "Done".[[File:interlanguages-
manageTD-paraminfo.png|alt=Parameter settings|center|thumb|521x521px|Parameter settings]] # "Click"
"Add language" to add a new template description for this language. [[File:interlanguages-manageTD-addlang.
png|alt=adding a template description|center|thumb|450x450px|adding a template description]] # "Select" the
user language that corresponds to the current language parameter. [[File:interlanguages-manageTD-addlang-
es.png|alt=select user language|center|thumb|450x450px|select user language]]<br /> # "Enter" a template
description and click "Apply". This description is shown when the user selects a template in the visual editor.
[[File:interlanguages-manageTD-addlang-es-desc.png|alt=template
description|center|thumb|450x450px|template description]] {{Messagebox|boxtype=important|icon=|Note text=If
you have changed the original default values for the language variables, make sure to change the language
labels here accordingly. The labels for the l1, l2, l3,... languages need to match.<br/>[[File:interlanguages-
manageTD-labels.png|alt=check correct language associations|center|thumb|250x250px|check correct
language associations]]|bgcolor=}} ==Alignment of the language switcher== By default, the language switcher
appears on the right side of the page. To display it on the left side, change the following line in the page
```

appears on the right side of the page. To display it on the left side, change the following line in the page `Template:Languages/styles.css:<syntaxhighlight lang="css"> #langbar-hz {text-align: left;} </syntaxhighlight>`  
 == Adding the language switcher to a page == It is possible to use both language switchers in the same wiki. They connect language versions in different scenarios: [[Multilingual wiki#Creating wiki pages with translated subpages|Using the language switcher template '''Languages''']] (for language versions that are maintained as subpages) [[Multilingual wiki#Connecting unrelated wiki pages|Using the language switcher template '''InterLanguages''']] (for language versions that are maintained as independent pages) \_\_NOTOC\_\_

```
<div class="downloadarea"> <span class="getButton">[[Media:HW-Minutes.zip|Download]]</span> [[File:HW-Minutes-en.png|450x450px]] </div>
```

This template contains a combined roll-up page for creating meeting minutes of different teams. A standard protocol page template is also included. The template can be expanded with additional page templates for different types of meeting minutes. ==Importing the template== The import file is included in the archive file "HW-Minutes.zip". Unpack the zip file first. On the page "Special:Import" follow these steps: #""Select file"" and choose "HW-Minutes.xml". #""Enter"" an Interwiki prefix. Since this field is required, simply add "hw" (for hallowelt). #""Keep"" the selection "Import to default locations". #""Click"" Sie "Upload file..." . The template is now available in your wiki.<br /> ==Pages included in the import== The xml import creates the following files in your wiki: \*Meeting minutes (in the "Main" namespace) \*Template:Meeting minutes \*Template:Meeting minutes/styles.css \*Template:Meeting minutes standard ==Using the template== ===Create a namespace=== Over time, you will create many pages for meeting minutes. It therefore makes sense to store them in their own namespace. We suggest that you create the "Minutes" namespace for this purpose. The template for minutes requires that this namespace is available. If you do not want to use the "Minutes" namespace in your wiki, you can adjust the expected namespace in the file "Template:Meeting minutes". To do this, change the prefix "Minutes" in the "inputbox" tag:<syntaxhighlight lang="text"> {{#tag:inputbox| ... prefix=Minutes:{{{1|{{PAGENAME}}}}}}/ </syntaxhighlight>to your own namespace, here exemplified as "Your\_namespace":<syntaxhighlight lang="text"> {{#tag:inputbox| ... prefix=Your\_namespace:{{{1|{{PAGENAME}}}}}}/ </syntaxhighlight> ===Add a navigation link=== To easily find and create meeting minutes, you should provide a direct link to the Minutes roll-up page in the [[Manual:Extension/BlueSpiceDiscovery/Main navigation|main navigation]]. By default, the page "Meeting minutes" is located in the main namespace. You can move it to any namespace you want. ==Customizing the template== ===Creating individual teams=== Three adjustments need to be made for each team section on the main "Meeting minutes" page: #The ""box heading"" with the team name. #""The team name"" used to create the file path for this team's minutes. This generates the main page prefix used for any meeting time for this team before the date. For example "Marketing"/2021-07-01. #The ""page template"" you want to use for the team's meeting minutes. By default, there is only one template (Meeting minutes standard) for all meeting minutes. Simply create a new page in the template namespace and assign it here as a preload template for a team. Example of a team:<syntaxhighlight lang="text"> <div class="block"> == My team== {{Meeting minutes|My team|preload=Template:Meeting minutes my team}} </div> </syntaxhighlight>Result: [[File:HW-Minutes-inputbox.png|center|thumb|350x350px|Inputbox for creating meeting minutes|link=Special:FilePath/HW-Minutes-inputbox.png]] <br /> \_\_NOTOC\_\_

Return to [Templates download/Minutes for teams](#).

## View source for Templates download/PortalFlex

You do not have permission to edit this page, for the following reason:

The action you have requested is limited to users in the group: **Users**.

You can view and copy the source of this page.

```
<div class="downloadarea"> <span class="getButton">[[Media:HW-PortalFlex-en.zip|Download]]</span> [[File:HW-PortalFlex-Combo.png|450x450px|link=Special:FilePath/HW-PortalFlex-Combo.png]] </div>
```

The template "Portal flex" allows you to create pages based on a 2 or 3 column layout. In addition, each page can contain an intro section. Individual pages that were created using this "Portal flex" template can be combined into one portal page using transclusion. (as shown in the "example image" on this page). The layout is responsive and shown optimized for different devices. ==Importing the template== The import file is included in the archive file "HW-PortalFlex.zip". Unpack the zip file first. On the page "Special:Import" follow these steps: ##"Select file" and choose "HW-PortalFlex-en.xml". ##"Enter" an Interwiki prefix. Since this field is required, simply add "hw" (for hallowelt). ##"Keep" the selection "Import to default locations". ##"Click" "Upload file...". The form-based template is now available in your wiki. ==Creating portal pages== To create a portal page: # "Add" the page "Template:Portal flex PT as a page template to your wiki." ## Go to the template manager at "Special:PageTemplatesAdmin." ## Click the "+" button to add the template as a new page template for the entire wiki: ##\* Template name: Portal page ##\* Description: Generic portal page ##\* Namespace: (all) ##\* Template: Template:Portal flex PT[[File:portalflex-PT.png|alt=Adding the Portal template to the wiki|center|thumb|550x550px|Adding the Portal template to the wiki]] # "Create" a new wiki page. You should now have the template Portal page available for selection. [[File:portalflex-PT-select.png|alt=Selecting the portal page template|center|thumb|400x400px|Selecting the portal page template]] # "Save" the new page. [[File:portalflex-PT-savepage.png|alt=Saving the new portal page|center|thumb|650x650px|Saving the new portal page]] # To "edit the form settings" or to add simple text or graphics, click "...all actions" in the page tools and then click Edit with form. After changing the settings as needed, save the page. If you want to add dynamic content such as SMW-queries, you need to click "Edit source" instead of "Edit with form". ##"Create" new boxes in forms edit mode by clicking "New box" and add your content. You can move the boxes up or down in order once you have multiple boxes. You can also override the default background color for an individual box. For example, if you selected white or grey for the default color of your boxes, you can emphasize an individual box by giving it a blue or red background color. You can also hide the heading of an individual box. <br /> [[File:HW-PortalFlex-boxverschieben.png|center|thumb|650x650px|Move box up or down (1), delete box (2), add new Box above the current box (3)|link=Special:FilePath/HW-PortalFlex-boxverschieben.png]] ##"Choose," if necessary, the number of placeholders (1). If, for example, you have chosen a 2-column layout, but you have 3 boxes on the page, then the 3rd box, by default, is shown in full page width. If you select 1 empty placeholder box, then the 3rd box will use only 1/2 of the page width. <br /> [[File:HW-PortalFlex-Platzhalter.png|link=https://en.wiki.bluespice.com/wiki/File:HW-PortalFlex-Platzhalter.png|alt=Placeholder for unused columns to distribute available width.|center|thumb|650x650px|Placeholder for unused columns to distribute available width.]] # "Click" "Show preview" (2). Here you can check your previous settings. Then scroll to the bottom of the page to get back to the form. ##"Click" "Save page" when you have finished your edits. ==Pages included in the import== The xml import creates the following files in your wiki: \*Template:Portal flex/Start \*Template:Portal flex/Box \*Template:Portal flex/End \*Template:Portal flex/styles.css \*Template:Portal flex PT \*Form:Portal flex<br /> \_\_NOTOC\_\_
