```
#'''Vertical alignment:''' It should not be necessary to provide an alignment value. The standard is set to text-top and usually works in headings and in flow-text. If it looks a little off, you can try other vertical-alignment values, such as text-bottom. For a full list of possible values, see https://www.w3schools.com/cssref/pr_pos_vertical-align.asp.

## Revision as of 17:29, 6 April 2022

This template makes it possible to insert Bootstrap icons on a page.

## Importing the template

The import file is included in the archive file *HW-Icon.zip*. Unpack the zip file first.

On the page *Special:Import*, follow these steps:

**Select file** and choose *HW-Icon.xml*.

**Enter** an *interwiki prefix*. Since this field is required, simply add *hw* (for hallowelt).

**Keep** the selection *Import to default locations*.

**Click** *Upload file...*

The template is now available in your wiki.

## Pages included in the import

The xml import creates the following file in your wiki:

Template:Icon

## Using the template

**Find** a bootstrap icon from the Bootstrap website at <https://icons.getbootstrap.com/>

**Click** on the icon you would like to use. The icon page shows you the class-name of the icon on the right side of the page:

The screenshot shows the Bootstrap icon page for the 'Award' icon. At the top left, it says 'Icons / Award'. The main heading is 'Award', with tags 'prize, rosette' and category 'Real world'. On the right, there is an advertisement for 'Aha! Develop'. The central part of the page features a large grid with the 'Award' icon (a rosette) in the center. An orange arrow points from the icon to the 'Code point' section on the right. The 'Download' section has a 'Download SVG' button. The 'Icon font' section shows the code snippet `<i class="bi bi-award"></i>` with a copy icon. The 'Code point' section lists: Unicode: U+F154, CSS: \F154, JS: \uF154, HTML: &#xF154;. Below the grid is an 'Examples' section with a 'Heading' example and the text 'Bootstrap icon css-class'.

**Highlight** the class name (it has the format *bi bi-myicon*) and **copy** it to your clipboard (ctrl+c).

**Go back** to your wiki page.

**Enter** `{{` in visual editing mode at the cursor position where you want to insert the icon. The template editor opens.

**Copy** the icon class from your clipboard:

**Vertical alignment**

e.g. text-bottom

Template editor

**Change** the font size (optional) if you want the size to be different from the text surrounding it (e.g., from the size of a heading if the icon is placed in the heading or of the paragraph text if the icon is placed in the flow-text. Smaller than text icons are usually sized no smaller than 0.85em and larger icons up to 2.5em.

**Color:** If you want the color to be different from the surrounding text, you can specify any web color (e.g., a color name like blue or a hex-valuesuch as #0059b3 for a more specific blue). A list of web colors can be found at [https://www.w3schools.com/colors/colors\\_picker.asp](https://www.w3schools.com/colors/colors_picker.asp)

**Vertical alignment:** It should not be necessary to provide an alignment value. The standard is set to text-top and usually works in headings and in flow-text. If it looks a little off, you can try other vertical-alignment values, such as text-bottom. For a full list of possible values, see [https://www.w3schools.com/cssref/pr\\_pos\\_vertical-align.asp](https://www.w3schools.com/cssref/pr_pos_vertical-align.asp).

**Click** *Apply changes*.

The icon is now displayed on the page.
