

Templates download/Icon

This template makes it possible to insert Bootstrap icons on a page.

Importing the template

The import file is included in the archive file *HW-Icon.zip*. Unpack the zip file first.

On the page *Special:Import*, follow these steps:

Select file and choose HW-Icon.xml.

Enter an *interwiki prefix*. Since this field is required, simply add hw (for hallowelt).

Keep the selection *Import to default locations*.

Click *Upload file...*

The template is now available in your wiki.

Pages included in the import

The xml import creates the following file in your wiki:

Template:Icon

Using the template

Find a bootstrap icon from the Bootstrap website at <https://icons.getbootstrap.com/>

Click on the icon you would like to use. The icon page shows you the class-name of the icon on the right side of the page:

The screenshot shows the Bootstrap icon page for the 'Award' icon. The page includes the following elements:

- Header:** 'Icons / Award' breadcrumb, title 'Award', tags 'prize, rosette', and category 'Real world'.
- Icon Preview:** A large grid showing the 'Award' icon (a rosette with a ribbon) centered. An orange arrow points from the icon to the code block.
- Download Section:** A 'Download SVG' button.
- Icon font Section:** A code block containing the HTML class: `<i class="bi bi-award"></i>`. A copy icon is visible to the right of the code.
- Code point Section:** Lists various encodings for the icon: Unicode: U+F154, CSS: \F154, JS: \uF154, HTML: 
- Examples Section:** A search bar with 'Heading' entered and a 'Bootstrap icon css-class' label below it.

Highlight the class name (it has the format *bi bi-myicon*) and **copy** it to your clipboard (ctrl+c).

Go back to your wiki page.

Enter `{{` in visual editing mode at the cursor position where you want to insert the icon. The template editor opens.

Copy the icon class from your clipboard:

Font-size

e.g. 0.9em; 1.5em

Color

#0059b3

Vertical alignment

e.g. text-bottom

Template editor

Change the font size (optional) if you want the size to be different from the text surrounding it (e.g., from the size of a heading if the icon is placed in the heading or of the paragraph text if the icon is placed in the flow-text. Smaller than text icons are usually sized no smaller than 0.85em and larger icons up to 2.5em.

Color: If you want the color to be different from the surrounding text, you can specify any web color (e.g., a color name like blue or a hex-valuesuch as #0059b3 for a more specific blue). A list of web colors can be found at https://www.w3schools.com/colors/colors_picker.asp

Vertical alignment: It should not be necessary to provide an alignment value. The standard is set to text-top and usually works in headings and in flow-text. If it looks a little off, you can try other vertical-alignment values, such as text-bottom. For a full list of possible values, see https://www.w3schools.com/cssref/pr_pos_vertical-align.asp.

Click *Apply changes*.

The icon is now displayed on the page.
