## Importing the template

The import file is included in the archive file *HW-Icon.zip*. Unpack the zip file first.

On the page *Special:Import*, follow these steps:

1. **Select file** and choose HW-Icon.xml.
2. **Enter** an *interwiki prefix*. Since this field is required, simply add hw (for hallowelt).
3. **Keep** the selection *Import to default locations*.
4. **Click** *Upload file...*

The template is now available in your wiki.

## Pages included in the import

The xml import creates the following file in your wiki:

- Template:Icon

## Using the template

**Important!** BlueSpice does not always include the latest version of bootstrap icons. [See the list of currently supported icons.](#)

1. **Find** a bootstrap icon from the Bootstrap website at <https://icons.getbootstrap.com/> **Click** on the icon you would like to use. The icon page shows you the class-name of the icon on the right side of the page:

The screenshot shows the Bootstrap icon page for the 'Award' icon. The page title is 'Award' with tags 'prize, rosette' and category 'Real world'. The icon itself is a black rosette with a bow tie. To the right, there is a 'Download' section with a 'Download SVG' button. Below that is the 'Icon font' section, which shows the code snippet `<i class="bi bi-award"></i>` highlighted with an orange box and an orange arrow pointing to it. Below the icon font section is the 'Code point' section, which lists the Unicode, CSS, JS, and HTML representations of the icon. At the bottom, there is an 'Examples' section with a heading 'Heading' and a text box containing 'Bootstrap icon css-class'.

2. **Highlight** the class name (it has the format *bi bi-myicon*) and **copy** it to your clipboard (ctrl+c).
3. **Go back** to your wiki page.
4. **Enter** `{{` in visual editing mode at the cursor position where you want to insert the icon. The template editor opens.
5. **Copy** the icon class from your clipboard:

6. **Change** the font size (optional) if you want the size to be different from the text surrounding it (e.g., from the size of a heading if the icon is placed in the heading or of the paragraph text if the icon is placed in the flow-text. Smaller than text icons are usually sized no smaller than 0.85em and larger icons up to 2.5em.
7. **Color:** If you want the color to be different from the surrounding text, you can specify any web color (e.g., a color name like blue or a hex-valuesuch as #0059b3 for a more specific blue). A list of web colors can be found at [https://www.w3schools.com/colors/colors\\_picker.asp](https://www.w3schools.com/colors/colors_picker.asp)
8. **Vertical alignment:** It should not be necessary to provide an alignment value. The standard is set to text-top and usually works in headings and in flow-text. If it looks a little off, you can try other vertical-alignment values, such as text-bottom. For a full list of possible values, see [https://www.w3schools.com/cssref/pr\\_pos\\_vertical-align.asp](https://www.w3schools.com/cssref/pr_pos_vertical-align.asp).
9. **Click** *Apply changes*.

The icon is now displayed on the page.
