Templates download/Icon

Starting with BlueSpice 4.3, icons can be inserted as a [Content droplet](#). Therefore, importing this template is no longer necessary.

Starting with BlueSpice 4.3, these button links can be inserted as a [Content droplet](#). Therefore, importing this template is no longer necessary.

This template makes it possible to insert Bootstrap icons on a page.

-  05/22 [Construction in the parking area B2 until 06/04](#)
-  04/28 [New quarterly report available](#)

Importing the template

The import file is included in the archive file *HW-Icon.zip*. Unpack the zip file first.

On the page *Special:Import*, follow these steps:

1. **Select file** and choose HW-Icon.xml.
2. **Enter** an *interwiki prefix*. Since this field is required, simply add hw (for hallowelt).
3. **Keep** the selection *Import to default locations*.
4. **Click** *Upload file...*

The template is now available in your wiki.

Pages included in the import

The xml import creates the following file in your wiki:

- Template:Icon

Using the template

Important! BlueSpice does not always include the latest version of bootstrap icons. [See the list of currently supported icons.](#)

1. **Find** a bootstrap icon from the Bootstrap website at <https://icons.getbootstrap.com/> **Click** on the icon you would like to use. The icon page shows you the class-name of the icon on the right side of the page:

The screenshot shows the Bootstrap icon page for the 'Award' icon. The page title is 'Award' with tags 'prize, rosette' and category 'Real world'. The icon is a black rosette with a bow tie. To the right, there is a 'Download' section with a 'Download SVG' button. Below that is an 'Icon font' section with a code snippet: `<i class="bi bi-award"></i>`. An orange arrow points from the icon to this code snippet. Below the icon font section is a 'Code point' section with Unicode, CSS, JS, and HTML codes. At the bottom, there is an 'Examples' section with a heading 'Heading' and a text box containing 'Bootstrap icon css-class'.

2. **Highlight** the class name (it has the format *bi bi-myicon*) and **copy** it to your clipboard (ctrl+c).
3. **Go back** to your wiki page.
4. **Enter** `{{` in visual editing mode at the cursor position where you want to insert the icon. The template editor opens.
5. **Copy** the icon class from your clipboard:

6. **Change** the font size (optional) if you want the size to be different from the text surrounding it (e.g., from the size of a heading if the icon is placed in the heading or of the paragraph text if the icon is placed in the flow-text. Smaller than text icons are usually sized no smaller than 0.85em and larger icons up to 2.5em.
7. **Color:** If you want the color to be different from the surrounding text, you can specify any web color (e.g., a color name like blue or a hex-valuesuch as #0059b3 for a more specific blue). A list of web colors can be found at https://www.w3schools.com/colors/colors_picker.asp
8. **Vertical alignment:** It should not be necessary to provide an alignment value. The standard is set to text-top and usually works in headings and in flow-text. If it looks a little off, you can try other vertical-alignment values, such as text-bottom. For a full list of possible values, see https://www.w3schools.com/cssref/pr_pos_vertical-align.asp.
9. **Click** *Apply changes*.

The icon is now displayed on the page.

Content Droplets

 ContentDroplets is available from BlueSpice 4.3.2.

Contents

1	Adding a droplet to a page	6
2	List of droplets	6
3	More info	16

To insert additional functionality in a wiki page, you can use Content droplets. Content droplets include tags that were previously accessed from *Insert > Magic word* in the editor toolbar. They also provide access to some templates that are preconfigured in the wiki, such as message boxes.

Adding a droplet to a page

To add a droplet to a page:

1. **Click** the Content droplets icon in the editor toolbar or type `<<`.
2. **Search** for a droplet name in the search bar of the droplets menu or browse the droplets by category.

3. **Select** a droplet
4. **Click** *Insert*.

Note: Some droplets open an inspector menu which contains another *Insert* button. Be sure to confirm that button as well.

Based on the type of droplet, you can continue with configuring the droplet as needed.

A diagram illustrating a message box. The message box is a light yellow rectangle with a thin red border. Inside the box, on the left, is a red circular icon containing a white exclamation mark. To the right of the icon, the word "Heading" is written in bold black text, and below it, the text "Message text" is written in a regular black font. Below the message box, the text "Message of type \"important\"" is displayed in a regular black font.
