Templates download/Icon

Starting with BlueSpice 4.3, icons can be inserted as a Content droplet. Therefore, importing this template is no longer necessary.

Starting with BlueSpice 4.3, these button links can be inserted as a Content droplet. Therefore, importing this template is no longer necessary.

This template makes it possible to insert Bootstrap icons on a page.

Importing the template

The import file is included in the archive file *HW-Icon.zip*. Unpack the zip file first.

On the page *Special:Import,* follow these steps:

1. ***Select file*** and choose HW-Icon.xml.
2. **Enter** an *interwiki prefix*. Since this field is required, simply add hw (for hallowelt).
3. **Keep** the selection *Import to default locations*.
4. **Click** *Upload file...* .

The template is now available in your wiki.

Pages included in the import

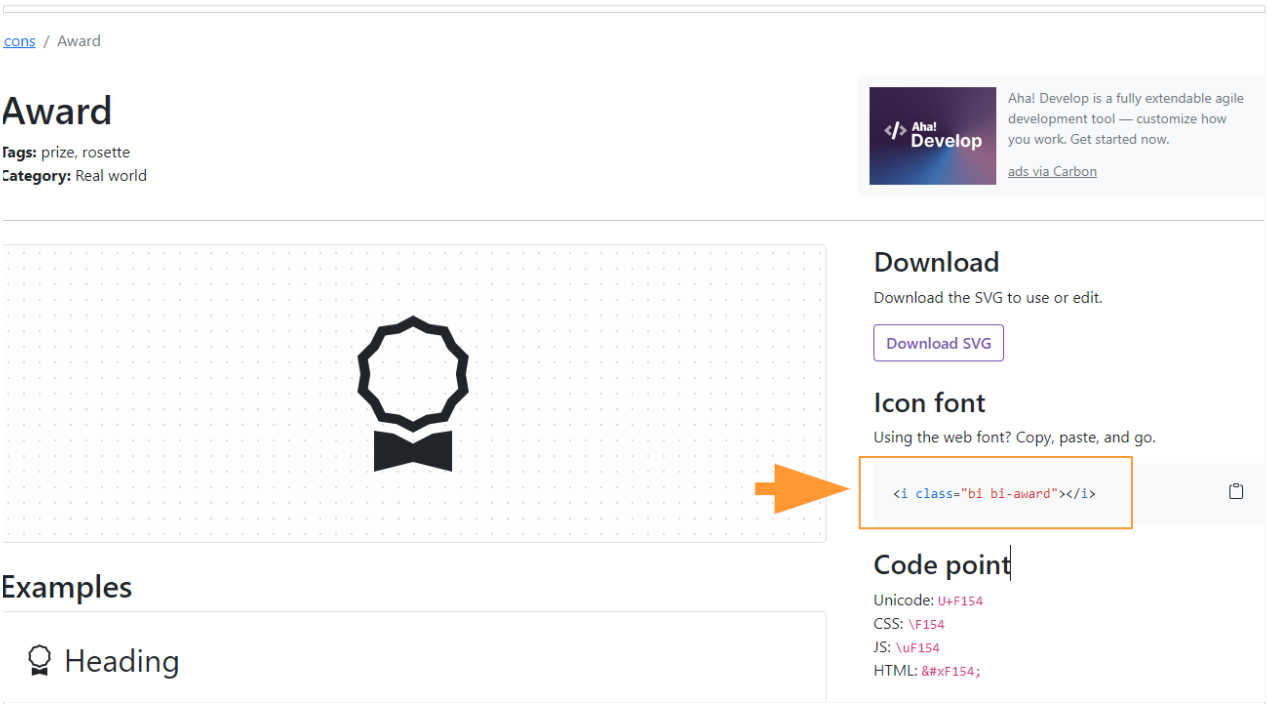

The xml import creates the following file in your wiki:

- Template:Icon

Using the template

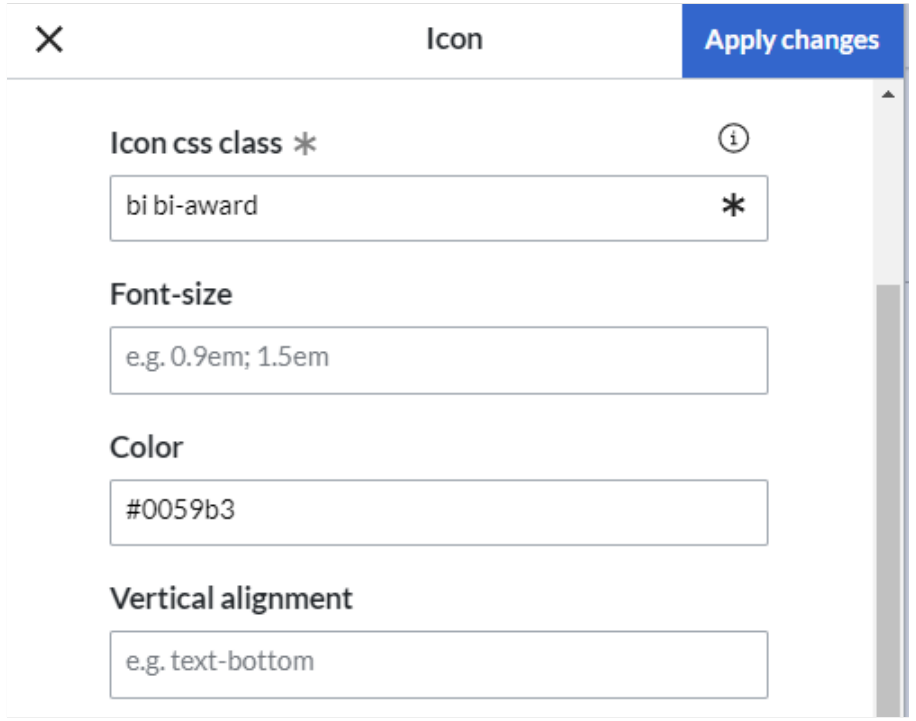

Important! BlueSpice does not always include the latest version of bootstrap icons. See the list of currently supported icons.

1. **Find** a bootstrap icon from the Bootstrap website at https://icons.getbootstrap.com/**Click** on the icon you would like to use. The icon page shows you the class-name of the icon on the right side of the page:

Bootstrap icon css-class

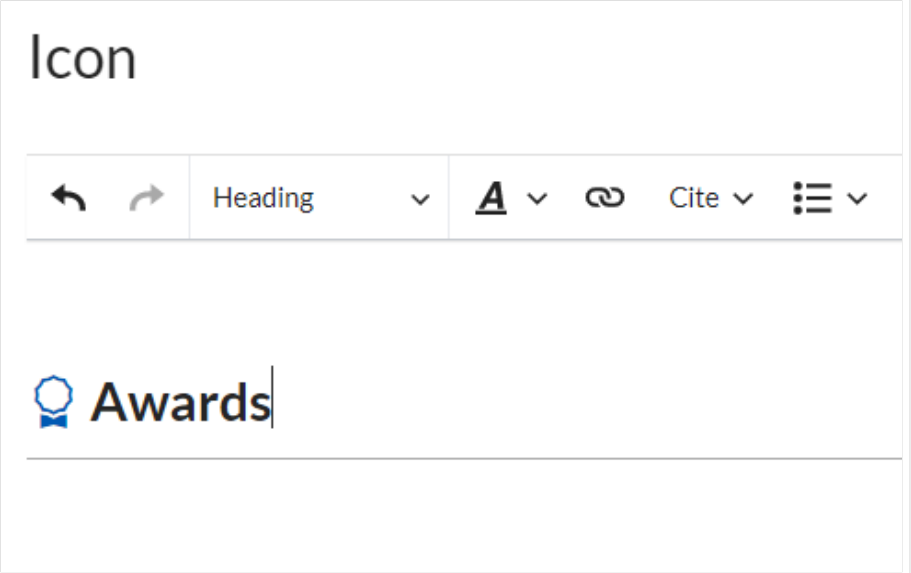

2. **Highlight** the class name (it has the format *bi bi-myicon*) and **copy** it to your clipboard (ctrl+c).
3. **Go back** to your wiki page.
4. **Enter** `{{` in visual editing mode at the cursor position where you want to insert the icon. The template editor opens.
5. **Copy** the icon class from your clipboard:

Template editor

6. **Change** the font size (optional) if you want the size to be different from the text surrounding it (e.g., from the size of a heading if the icon is placed in the heading or of the paragraph text if the icon is placed in the flow-text. Smaller than text icons are usually sized no smaller than 0.85em and larger icons up to 2.5em.
7. **Color:** If you want the color to be different from the surrounding text, you can specify any web color (e. g., a color name like blue or a hex-valuesuch as #0059b3 for a more specific blue). A list of web colors can be found at https://www.w3schools.com/colors/colors_picker.asp
8. **Vertical alignment:** It should not be necessary to provide an alignment value. The standard is set to text-top and usually works in headings and in flow-text. If it looks a little off, you can try other vertical-alignment values, such as text-bottom. For a full list of possible values, see https://www.w3schools.com/cssref/pr_pos_vertical-align.asp.
9. **Click** *Apply changes*.

The icon is now displayed on the page.
