Templates download/Messagebox

Starting with BlueSpice 4.3, these messages boxes can be inserted as a Content droplet. Therefore, importing this template is no longer necessary.

This template can be integrated into every wiki page from the editor toolbar (VisualEditor). The type of box (hint, tip, warning, etc.) can be specified as a parameter. This parameter sets the background color as well as the optional icon.

The symbol can be activated and deactivated.

Contents

1 Importing the template 3
2 Available parameters 3
3 Pages included in the import 4
4 Alignment adjustments 4

Importing the template

The import file is included in the archive file *HW-messagebox.zip*. Unpack the zip file first.

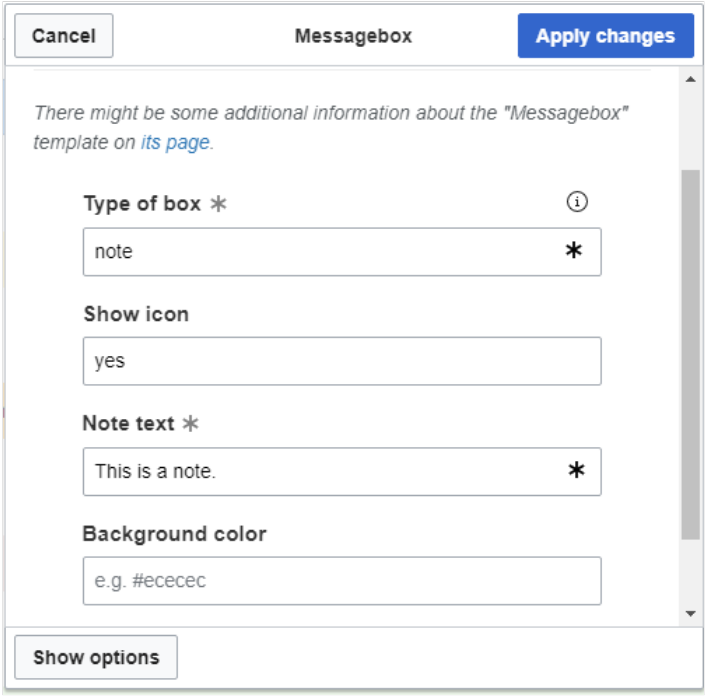

On the page *Special:Import* follow these steps:

1. **Select file** and choose *HW-messagebox.xml*.
2. **Enter** an Interwiki prefix. Since this field is required, simply add *hw* (for hallowelt).
3. **Keep** the selection *Import to default locations*.
4. **Click** Sie *Upload file...* .

The template is now available in your wiki and can be added to a page from the VisualEditor *Insert>Template* link.

Available parameters

Parameter	Description
Type of box	Determines the color of the box and the label. Allowed values (case-sensitive): `note` , `warning` , `tip` , `important` , `example` , `success` , `neutral`
Note text	Content of the box. Allows wikitext.
Show icon	Sets an additional icon for the box type. Default value: `(empty)` , Allowed value: `yes`
Background color	overwrites the default background color of a boxtype. Example: `#ef5f5f5` (light grey) To find a color: https://www.w3schools.com/colors/colors_picker.asp

Visual editor dialog for the message box

Pages included in the import

The xml import creates the following files in your wiki:

- Template:Messagebox
- Template:Messagebox/styles.css

Alignment adjustments

By default, the box is displayed in full-width. This means that it is displayed below any image that is used directly before the box.

To change this behavior to keep the box within the text-flow you can make the following change in Template:Messagebox/styles.css:

For the css-selector *.hw-messagebox*, **replace** the declaration "clear:both" with "overflow: hidden".

Before:

```
.cd-textbox {
...
clear:both;
}
```

Afterwards:

```
.cd-textbox {
...
overflow hidden;
}
```

Lorem ipsum dolor sit amet, consetetur sadipscing elitr, sed diam nonumy eirmod tempor invidunt ut labore et dolore magna aliquyam erat, sed diam voluptua.

At vero eos et accusam et justo duo dolores et ea rebum. Stet clita kasd gubergren, no sea takimata sanctus est Lorem ipsum dolor sit amet. Lorem ipsum dolor sit amet,

Note: This is a note.

It contains line breaks, too.

Lorem ipsum

Messagebox within text-flow

Content Droplets

ContentDroplets is available from BlueSpice 4.3.2.

Contents

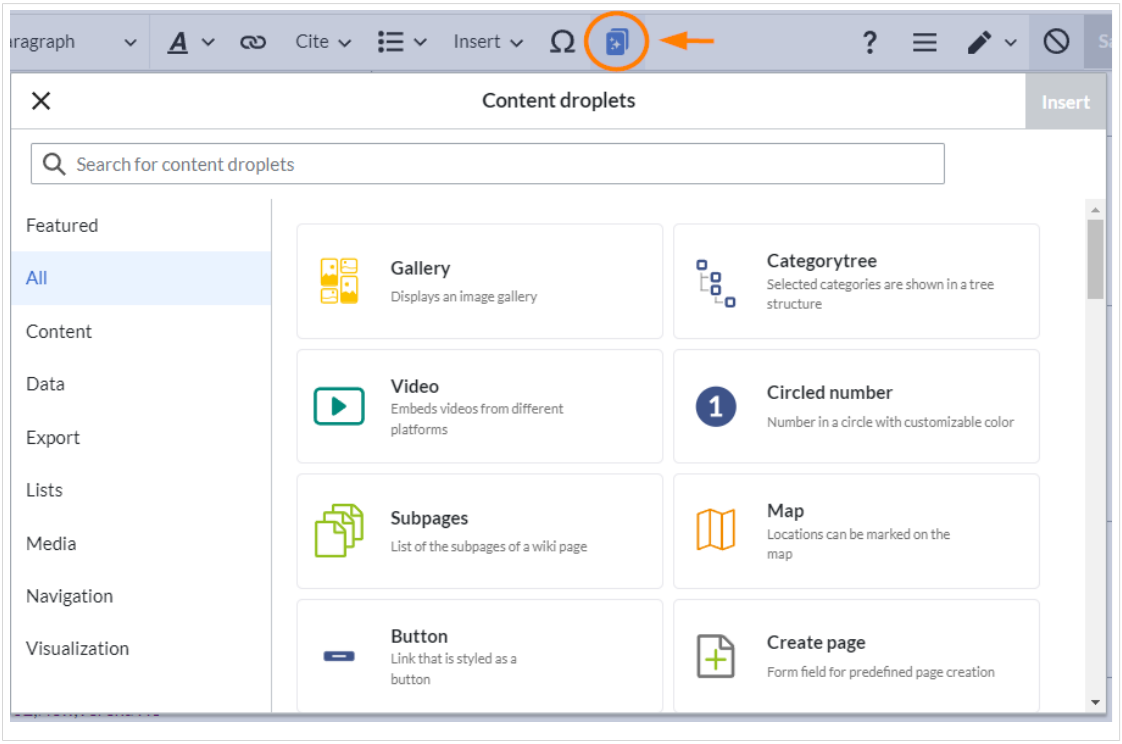

1 Adding a droplet to a page 6
2 List of droplets 6
3 More info 16

To insert additional functionality in a wiki page, you can use Content droplets. Content droplets include tags that were previously accessed from *Insert > Magic word* in the editor toolbar. They also provide access to some templates that are preconfigured in the wiki, such as message boxes.

Adding a droplet to a page

To add a droplet to a page:

1. **Click** the Content droplets icon in the editor toolbar or type `<<`.
2. **Search** for a droplet name in the search bar of the droplets menu or browse the droplets by category.

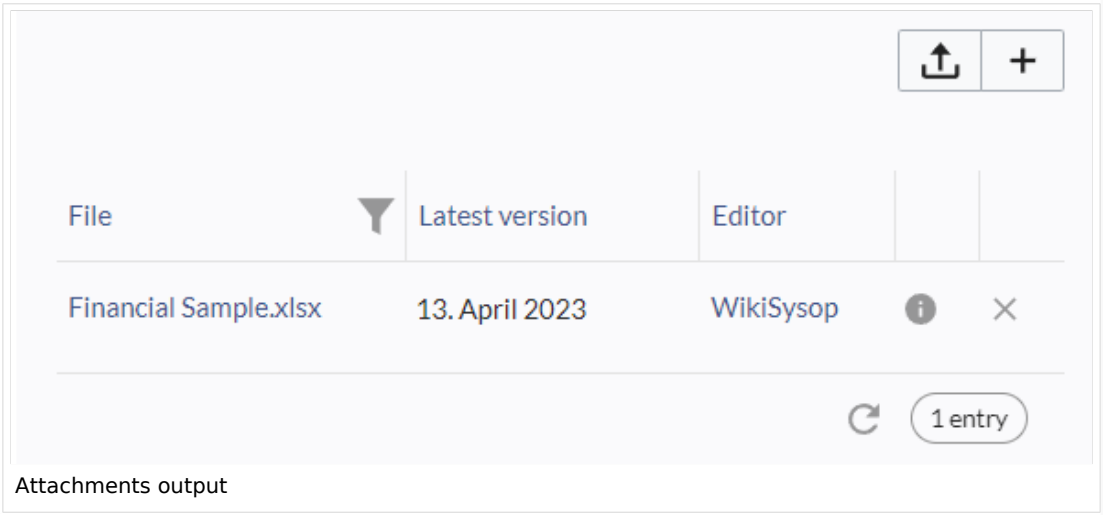

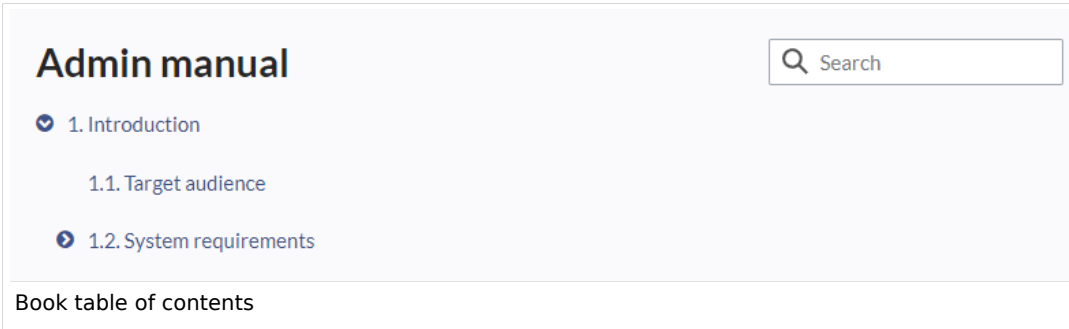

3. **Select** a droplet
4. **Click** *Insert*.

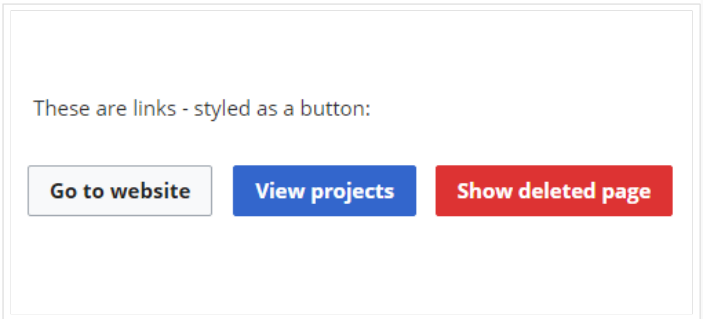

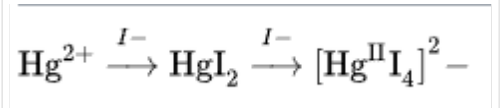

> **Note:** Some droplets open an inspector menu which contains another *Insert* button. Be sure to confirm that button as well.

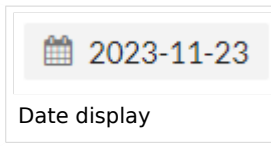

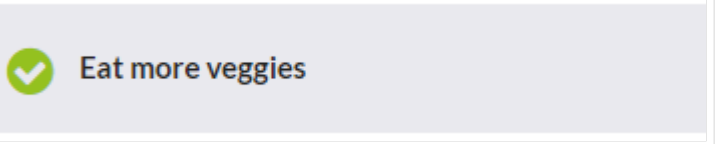

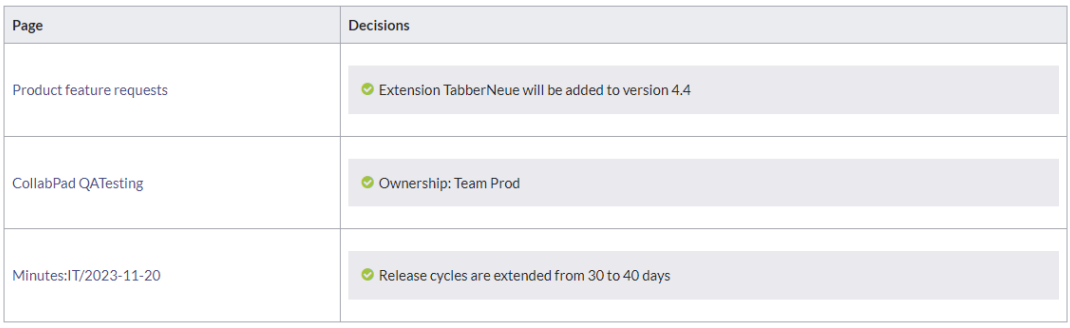

Based on the type of droplet, you can continue with configuring the droplet as needed.

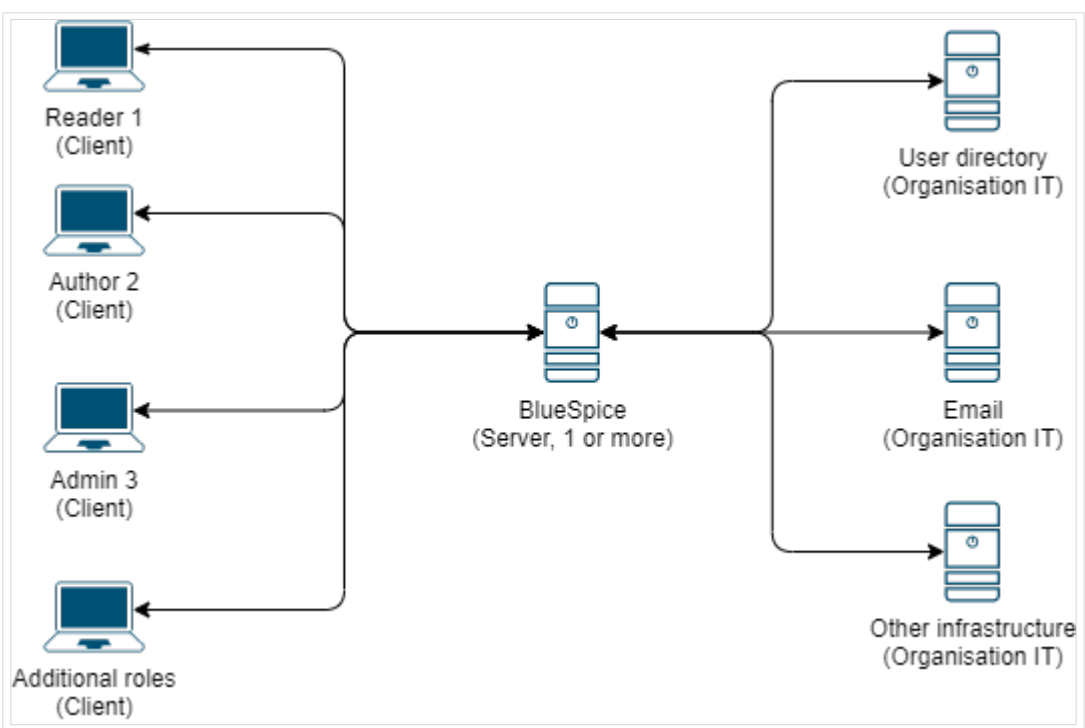

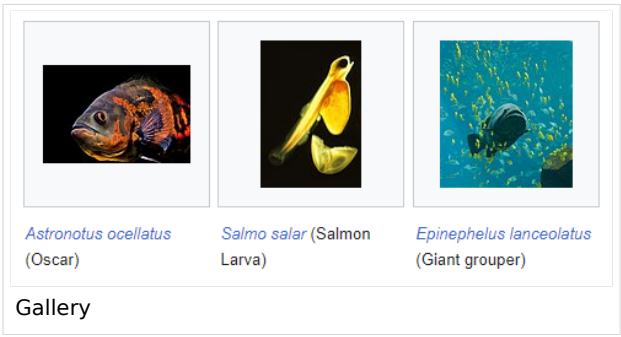

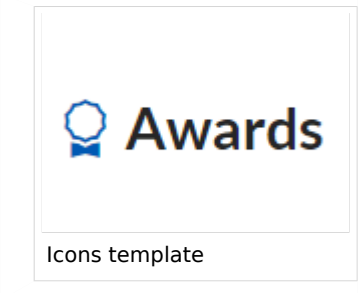

List of droplets

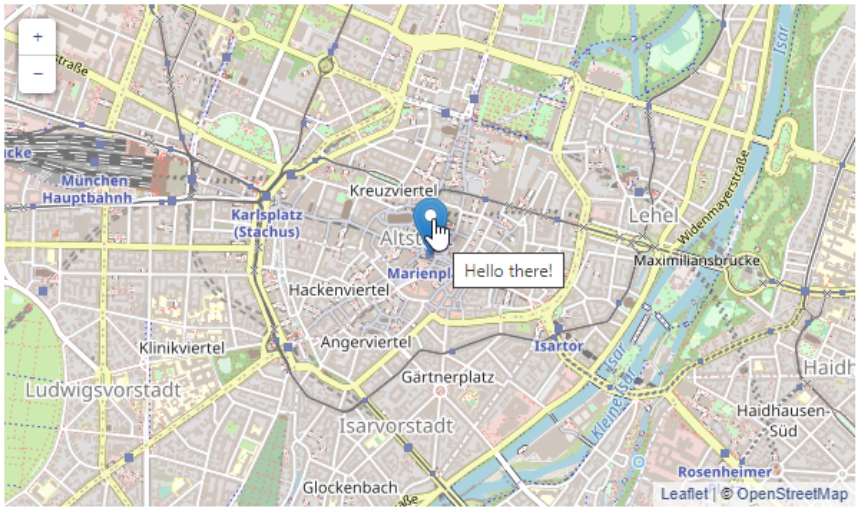

View examples of droplets outputs.

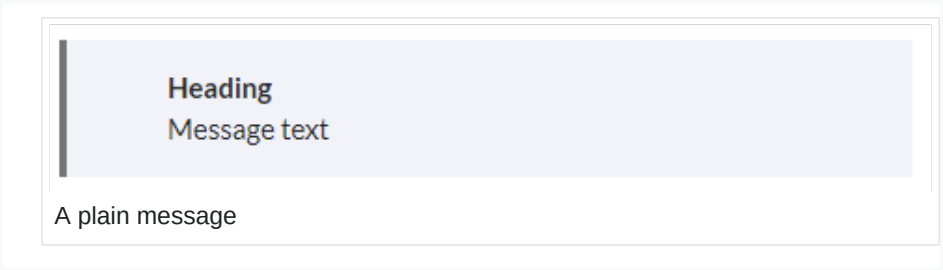

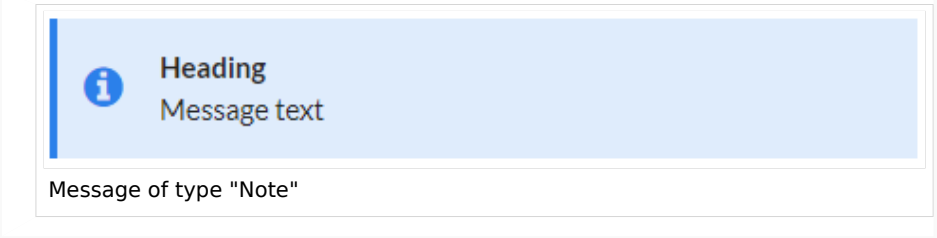

Droplet	Descript
Attachments  Attachments output	Area for organising attachme
Booklist	List of boo based on filter valu The value needs to b defined as metadata value in th book setti
Book PDF link v4.4+	PDF-downl link to a bo
