Templates download/Minutes for teams

This template contains a combined roll-up page for creating meeting minutes of different teams. A standard protocol page template is also included.

The template can be expanded with additional page templates for different types of meeting minutes.

 **Download**

Attendees

Antje Kramer (secretary), Mark Pichler, Ursula Gerstmair, Hu Cheng

Agenda

Time	Duration	Topic	Responsible
10:00 AM	30 min	Review of open leads	
10:30 AM	15 min	Strategy: customer relations	
10:45 AM	15 min	New pricing concept	
11:00 AM	60 min	End of meeting	

Results

- 6 of 9 leads are promising, follow-ups to be scheduled
- Pricing structure too difficult for customers to understand
- Missing documentation for customer relations processes

Action items

Description	Responsible	Due date
Follow-ups		
Meeting with management regarding new prices	Hu	week 35
Documentation for customer relations strategy in wiki	Antje	week 36

Importing the template

The import file is included in the archive file *HW-Minutes.zip*. Unpack the zip file first.

On the page *Special:Import* follow these steps:

1. **Select file** and choose *HW-Minutes.xml*.
2. **Enter** an Interwiki prefix. Since this field is required, simply add *hw* (for hallowelt).
3. **Keep** the selection *Import to default locations*.
4. **Click** *Upload file...*

The template is now available in your wiki.

Pages included in the import

The xml import creates the following files in your wiki:

- Meeting minutes (in the *Main* namespace)
- Template:Meeting minutes
- Template:Meeting minutes/styles.css

- Template:Meeting minutes standard

Using the template

Create a namespace

Over time, you will create many pages for meeting minutes. It therefore makes sense to store them in their own namespace. We suggest that you create the "Minutes" namespace for this purpose. The template for minutes requires that this namespace is available.

If you do not want to use the "Minutes" namespace in your wiki, you can adjust the expected namespace in the file *Template:Meeting minutes*. To do this, change the prefix *Minutes* in the *inputbox* tag:

```
{{#tag:inputbox|
...
prefix=Minutes:{{{1|{{PAGENAME}}}}}}/
```

to your own namespace, here exemplified as *Your_namespace*:

```
{{#tag:inputbox|
...
prefix=Your_namespace:{{{1|{{PAGENAME}}}}}}/
```

Add a navigation link

To easily find and create meeting minutes, you should provide a direct link to the Minutes roll-up page in the [main navigation](#). By default, the page *Meeting minutes* is located in the main namespace. You can move it to any namespace you want.

Customizing the template

Creating individual teams

Three adjustments need to be made for each team section on the main *Meeting minutes* page:

1. The **box heading** with the team name.
2. **The team name** used to create the file path for this team's minutes. This generates the main page prefix used for any meeting time for this team before the date. For example *Marketing/2021-07-01*.
3. The **page template** you want to use for the team's meeting minutes. By default, there is only one template (Meeting minutes standard) for all meeting minutes. Simply create a new page in the template namespace and assign it here as a preload template for a team.

Example of a team:

```
<div class="block">
== My team==
{{Meeting minutes|My team|preload=Template:Meeting minutes my team}}
</div>
```

Result:

My team

2021-07-02

5 Additional customizations	8
6 Related info	8

Overview

By default, some links are provided as entry points to the wiki. Wiki administrators can deactivate these links in the [configuration manager](#) if needed. In addition, you can also add new links below the entrypoints (admin permissions required). Please note that no hierarchical links can be created. Therefore, it makes sense to mainly set up links to the most important topics and to portal pages that contain additional links or page lists.

Editing the main navigation

To open the menu editor:

1. **Click** *Edit sidebar* at the bottom of the navigation menu. If the page does not exist yet, you will see a notice on the page.

Menu editor

* Visual menu editor is available from BlueSpice 4.2.

To add a new menu header using the menu editor:

1. **Click** *Add new element* to create a new menu header.

+ Add new element

Add a new menu heading

2. **Enter** the text for your menu header. In a multilingual wiki, you can also enter a [message key](#).

Cancel

Edit element

Done

Node type
Text or message key

Edit text or message key
Text or a message key

Topics *

Enter a heading name

3. **Click** Done.

To add links:

1. **Select** *Add new subitem* from the dropdown menu of the menu header.

Quicklinks

Edit node
Remove
Add new subitem

add a link as a new subitem

2. Enter the page name as the link target and the label that you want to show:

Cancel

Edit element

Done

Edit link
Link target

IMS:Process descriptions *

Link label

Processes *

enter link info

3. **Click** Done.
4. **Repeat** steps 1-3.
5. **Click** *Save changes*.

Note: If you use the parser function `{{#ifingroup:...` to display navigation elements in the source code, you must always edit the main navigation in the source code. In visual editing mode, saving removes any parser function or semantic queries.

Source edit mode

To add new links:

1. **Change** to source editing mode.
2. **Create** one or more navigation links (with or without section heading). The following example shows a link to the page "Company" with the label "Our company" and an external link to the BlueSpice website with the label "Website". The links are grouped together under the section heading "Quicklinks":

```
*Quicklinks
**Company|Our company
**https://www.bluespice.com/de|Website
```

3. **Save** the page. The links are now shown in the main navigation.

Link labels may collide with system messages. If this is the case, simply append the HTML-code for an empty space to the description:

```
**Portal|Portal&#160;
```

Deactivating standard links

The standard links can be deactivated in the [configuration manager](#). The following settings are available under *Feature > Skinning*:

BlueSpiceBookshelf:

- Show entrypoint "Bookshelf"

BlueSpiceDiscovery:

- Show entrypoint "Mainpage"
- Show entrypoint "All pages"
- Show entrypoint "Recent changes"

BlueSpiceSocial:

- Show entrypoint "Timeline"

BlueSpiceSocialBlog:

- Show entrypoint "Blog"

Group-specific navigation

It is possible to show navigation elements for specific user groups only. Please note that the pipe symbol (|) between the page name and its label has to be escaped as `{{!}}` within this function.

This syntax is defined in the extension [UserFunctions](#).

```
{{#ifingroup:sysop,widgeteditor |  
*Test2  
**somepage{{!}}Some page  
|}}
```

Note: Anytime the page is saved using the visual menu editor, the parser function will be overwritten and no longer works!

Additional customizations

- [Alignment for navigation with long link labels](#)
- [Display icons with navigation links](#)
- [Multi-language navigation](#)
