Templates download/Subpages

Starting with BlueSpice 4.3, these subpage lists can be inserted as a [Content droplet](#). Therefore, importing this template is no longer necessary.

This template can be integrated into every wiki page using the editor toolbar. It generates a list of subpages of a wiki page. You can create a single or multi-column layout, with or without bullets.

Importing the template

The import file is included in the archive file *HW-subpages.zip*. Unpack the zip file first.

On the page *Special:Import* follow these steps:

1. **Select file** and choose *HW-subpages.xml*.
2. **Enter** an Interwiki prefix. Since this field is required, simply add *hw* (for hallowelt).
3. **Keep** the selection *Import to default locations*.
4. **Click** *Upload file...*

The template is now available in your wiki.

Usage

Insert the template *Subpages* with VisualEditor. Provide the settings for the list:

Field	Description
Namespace	Namespace in which the parent page is located. Leave blank for the main namespace.

Field	Description
Parent page	The wiki page that has the subpages.
Column layout	no = flat list; yes = 3-column layout
Bullet points	yes = bulleted list; no = list without bullet points

Pages included in the import

The xml import creates the following file in your wiki:

- Template:Subpages
- Template:Subpages/styles.css

Content Droplets

ContentDroplets is available from BlueSpice 4.3.2.

Contents

1 Adding a droplet to a page	4
2 List of droplets	4
3 More info	14

To insert additional functionality in a wiki page, you can use Content droplets. Content droplets include tags that were previously accessed from *Insert > Magic word* in the editor toolbar. They also provide access to some templates that are preconfigured in the wiki, such as message boxes.

Adding a droplet to a page

To add a droplet to a page:

1. **Click** the Content droplets icon in the editor toolbar or type `<<`.
2. **Search** for a droplet name in the search bar of the droplets menu or browse the droplets by category.

3. **Select** a droplet
4. **Click** *Insert*.

Note: Some droplets open an inspector menu which contains another *Insert* button. Be sure to confirm that button as well.

Based on the type of droplet, you can continue with configuring the droplet as needed.
