Contents

Templates download/Transclusion

This template allows to include a section from a wiki page on another page. It can be styled as a colored box.

Importing the template

The import file is included in the archive file *HW-transclusion-en.zip*. Unpack the zip file first.

On the page *Special:Import* follow these steps:

1. **Select file** and choose *HW-sectiontransclusion.xml*.
2. **Enter** an Interwiki prefix. Since this field is required, simply add *hw* (for hallowelt).
3. **Keep** the selection *Import to default locations*.
4. **Click** *Upload file...* .

The template is now available in your wiki.

Pages included in the import

The xml import creates the following files in your wiki:

- Template:Transclusion
- Template:Transclusion/styles.css

Using the template

1. Add the template from the VisualEditor insert-dialog.
2. Fill in the form fields as needed.

> **Note:** If, after importin the template to your wiki, the input fields are not displayed when you first integrate it into a wiki page, you need to open the template in the template namespace, make a change (e.g. insert spaces) and save the template. The input fields should now be displayed correctly.

Input fields for transclusion

Input field	Description
Page to transclude into this document	Page name of the page containing the section (including the namespace prefix if the page is not in the main namespace).
Page section	Heading of the section you want to transclude. If a section contains sub-headings, these are included up to the next heading at the same level of the section.
Color style	If you want to apply a background color, you can select one here. Choices are: blue, green, grey, red, yellow
Background	If you don't like any of the color styles, you can enter your own color in hex format (e.g. # cce6ff).
Border	Creates a border color. Apply only when you use a custom background color instead of the color style (which already uses its own border color).
Padding	Distance from box to box content. Default value: 20px. You can set this to any other pixel-value or simple enter 0 for now padding.
