Organizing a new wiki

	Video	Description	Duration (in mins)	Required permissions role
	FlexiSkin	With FlexiSkin, you can customize your wiki design — for example: logo, colors, or fonts — in minutes.	6:30	admin, structuremanag
	Main navigation	By default, some links are provided as entry points to the wiki. Wiki administrators can deactivate these links in the configuration manager if needed. In addition, custom links can be added here.	4:30	admin, structuremanag
	Main page	This video shows you a convenient way to create a custom homepage layout. It can be applied to any wiki page.	7:43	editor
		Custom menu		

	Video	Description	Duration (in mins)	Required permissions role
	Custom menu	is an additional menu option with configurable items. It appears as a mega menu when expanded. Menu items can be modified by editing the page `MediaWiki:CustomMenu/Header`.	2:30	administrator, structuremanag
	Categories	In addition to namespaces, categories are an important organizational principle in the wiki. They allow pages to be grouped and automatically linked to the associated category pages.	7:53	editor, administrator (import)
		Page lists are dynamically created links to a group of pages based on certain selection criteria.		

	Video	Description	Duration (in mins)	Required permissions role
	Categor and page lists	BlueSpice has different mechanisms through which these lists can be created.	5:09	editor
