Lunch talk: Multilingual wiki

Supporting a multilingual wiki

"Smart" language switchers

Language support

options to define which languages are used in the wiki

Switching pages

a mechanism to automatically switch between the language versions of a page

Tracking

a property that tracks the page language for each page (supported in BlueSpice pro)
fallback: categories track the page language (BlueSpice free)

Support for display title

needed for the subpage-technique

Switcher comparison

Languages: subpages

InterLanguages: unrelated pages

User language support

Based on system messages

- imported with language switcher template
- needs to be checked for `{{CONTENTLANGUAGE}}`

`{{int: message name}}`

- Translates the **interface** message into the user language
- `{{int:lang}}`

Add or switch content

- Switch the entire page content
- Show additional content

Support templates/forms

Switch labels

Category system

Category manager

- 1-Wiki
 - APP Application
 - APP SAP
 - APPde Anwendung
 - APPde SAP
 - DEP Department
 - DEPde Abteilung
 - DOC Document type
 - DOC Process description
 - DOC Work instruction
 - DOCde Dokumententyp
 - DOCde Arbeitsanweisung
 - DOCde Prozessbeschreibung

Further considerations

Ad-hoc on-page translation (DeepL) -> duplicate page to make translation permanent
Improvements to sidebar regarding language support
MediaWiki translation extension
