User:Margit.link-rodrique/Agenda/Admin Training 35026

Agenda Day 1

10	Introduction (5), Agenda
40	Configuration of the wiki: • Menus • FlexiSkin • Privacy settings • Configuration manager
60	Content structuring: • Namespaces, Namespace manager • Categories, Category manager • Subpages
5	<i>Break</i>
	Permission management: • Permission concept

20	• Permission manager
40	Quality management: • Overview • Expiry • Page assignment • Reminder
30	<i>Break</i>
20	• Approvals
15	• Workflows
20	Tracking changes: • Recent changes page (MW help) • Watchlist (MW help) • Special pages: Wanted pages/files/categories
20	Blog function: • About BlueSpice social • Spezial page: Blog • Embedded Blogs / custom permissions

Agenda Day 2

15	Quiz 1, FAQ
15	Permissions - miscellaneous: PageAccess , Secured page assignments
20	Wikitext: • Syntax examples, allowed HTML • Functions
15	Page templates: • Built-in templates • Creating a page template • Page templates manager
30	Templates (MW help): • Types of templates • Creating a simple infobox • Adding a template to a page template • Categorizing content with templates • Displaying page properties in a template • <i>TemplateData</i> and <i>TemplateStyles</i> • Adding a custom property

30	Template editor (Page Forms): • Creating a form for the infobox • Connecting template and form • Manually editing the form
5	<i>Break</i>
30	Smart lists: • Basic smart list • Data query droplet • SMW inline queries • DPL3 page lists
10	Quiz 2
30	Start page templates
30	<i>Break</i>
60	Miscellaneous: • Adding templates to droplets • Importing Word documents • Books • Notifications • Helpdesk - where to find info
15	Customer topics / FAQ

User:Margit.link-rodrique/Lunch talk

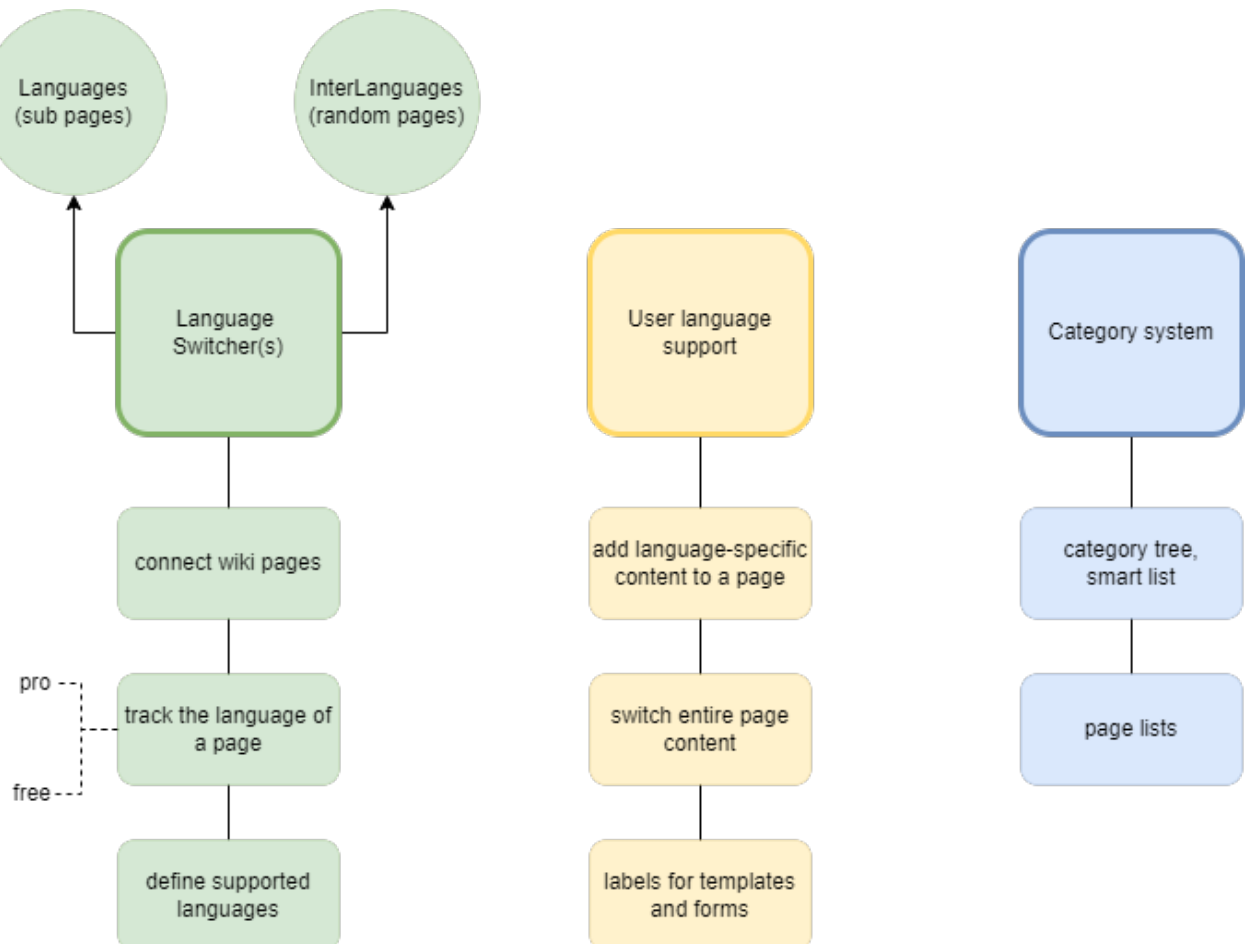

Redirect to:

- [User:Margit.link-rodrique/Lunch talk - multilingual wiki](#)

User:Margit.link-rodrique/Lunch talk - multilingual wiki

Lunch talk: Multilingual wiki

Supporting a multilingual wiki

"Smart" language switchers

Language support

options to define which languages are used in the wiki

Switching pages

a mechanism to automatically switch between the language versions of a page

Tracking

a property that tracks the page language for each page (supported in BlueSpice pro)

fallback: categories track the page language (BlueSpice free)

Support for display title

needed for the subpage-technique

Switcher comparison

- **Languages:** subpages
- **InterLanguages:** unrelated pages

User language support

Based on system messages

- imported with language switcher template
- needs to be checked for `{{CONTENTLANGUAGE}}`

```
{{int: message name}}
```

- Translates the **interface** message into the user language
- `{{int:lang}}`

Add or switch content

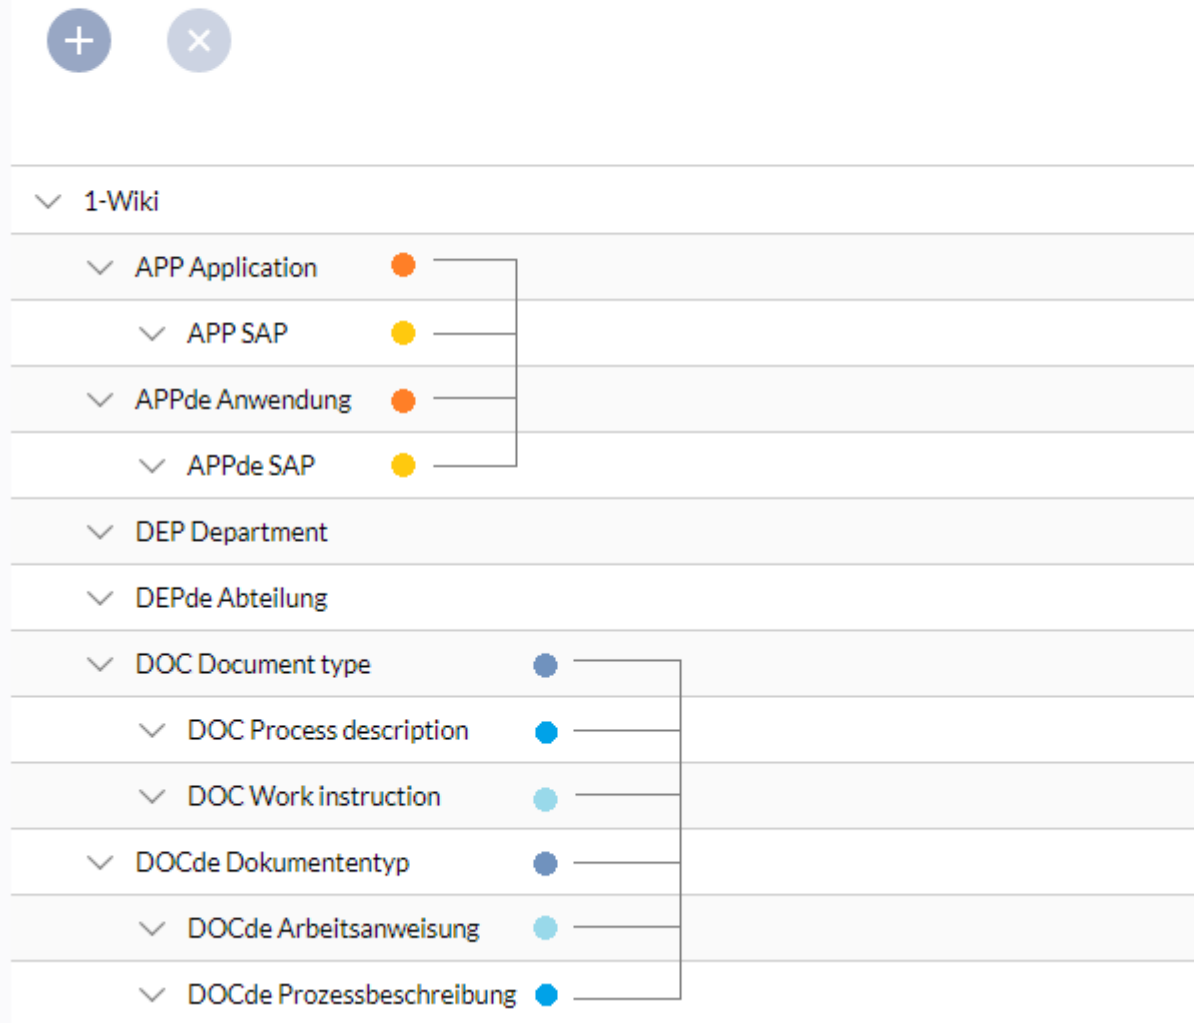

- Switch the entire page content
- Show additional content

Support templates/forms

Switch labels

Category system

Category manager

Further considerations

- Ad-hoc on-page translation (DeepL) -> duplicate page to make translation permanent
- Improvements to sidebar regarding language support
- MediaWiki translation extension

Documentation

Helpdesk EN: [Multilingual wiki](#)
